Preface

The Future of B2B Is Human. The world of business is not simply evolving. It is being **reinvented** — fundamentally, irreversibly, and at a pace that no playbook can fully capture.

We are emerging from a decade of profound disruption: a cascade of technological leaps, geopolitical realignments, climate pressures, and a global pandemic that rewired how we work, communicate, and trust. In this new reality, the old rules of B2B engagement — built on cold logic, rigid hierarchies, and transactional efficiency — no longer hold. They've been exposed as incomplete. outdated. fragile.

We now stand at the dawn of a new era. Not of business-to-business, but of **human-to-human (H2H) partnership**. For decades, B2B Branding management was treated as a secondary function — a matter of polished brochures, corporate logos, and clever taglines. Strategy resided in spreadsheets; branding was left to designers. But today, that separation is not just outdated — it's dangerous.

In a world of noise, skepticism, and endless choice, **a strong brand is no longer a nice-to-have. It is the most critical strategic asset a company possesses.**

- It is what cuts through complexity.
- It is what builds resilience in crisis.
- It is what turns data into trust, and trust into loyalty.

More than ever, buyers are not choosing the best spec — they are choosing the **most reliable partner**. And behind every RFP, every procurement meeting, every boardroom decision, is a human being: weighing risk, seeking reassurance, and looking for someone who *understands* — not just delivers.

This case study collection is born from that truth. It moves beyond theory, beyond models, and into the real world — where visionary leaders are redefining what B2B means. These are not abstract ideas. These are **blueprints for the future**.

Each case reveals a company that has embraced the H2H philosophy: one that balances analytical rigor with emotional intelligence, leverages artificial intelligence for hyper-personalization, and yet never loses sight of **ethics, empathy, and storytelling**. You'll meet leaders who use data not to replace human judgment, but to **amplify it**. Who builds agile brands that adapt quickly — but stay rooted in purpose. Who creates not just customers, but **advocates, collaborators, and co-creators**.
This is not about soft skills. It's about **strategic advantage** - because in the world of automation, the human touch is the ultimate differentiator.

This volume is for those shaping the future:

- **C-Suite Leaders** who know that brand is not a cost center, but a growth engine — and who are ready to future-proof their organizations with purpose-led strategy.
- **Marketing & Sales Pioneers** tasked with turning brand promise into measurable impact, alignment, and revenue — not through push, but through resonance.
- **Academics & Educators** who are reimagining business curricula for a world where brand, strategy, and human behavior are inseparable.
- **Ambitious Students** preparing to lead in a landscape where technical excellence must be matched by emotional intelligence.
- **Every professional** who believes business can — and must — be a force for good, building authentic connections in an increasingly digital world.

We extend our deepest gratitude to the executives, marketers, and innovators whose stories are shared here. Your courage to experiment, to lead with integrity, and to put people at the center of strategy offers lessons that ripple far beyond your organizations.

A special thank you to **Ahmed Kibria** and the **Global Marketing Nexus** team — whose global vision, collaborative spirit, and relentless curiosity made this deep dive possible. Your network is a living example of H2H in action and special thanks to Dr. Varsha Agarwal from Atlas University, Mumbai for proofreading the text.
We extend our sincere gratitude to the Mediterranean School of Business (MSB) for their invaluable contribution to the success of this first Tunisian edition of B2B Brand Management Case Studies Collection. As a strategic partner, MSB has demonstrated a remarkable commitment by mobilizing significant resources and expertise — from content development to event coordination — making this edition a reality. Their dedication to advancing business education in Tunisia has been a cornerstone of this project, and we are honored to have had them by our side throughout this journey.
The future of B2B is not about replacing humans with machines. It is about **augmenting human potential with technology**.
It is a symphony — of data and intuition, of logic and empathy, of strategy and soul. Our hope? That these cases do more than inform. That they **inspire**. That they **challenge**. That they give you the confidence — and the evidence — to not just adapt to this new era. But to **lead it**.

Disclaimer for Content

In the preparation of this work, the authors made selective use of artificial intelligence (AI) tools to support and enhance the creative and editorial process. Specifically, AI-assisted technologies were employed for:

- **Idea Generation:** To explore conceptual frameworks, structure case study analyses, and synthesize emerging themes in B2B branding, transformative marketing, and H2H marketing principles.
- **Language Improvement:** To refine sentence structure, enhance clarity, correct grammar, and improve the overall readability and flow of the text.
- **Draft Refinement:** To assist in rephrasing, summarizing, and editing content for precision and coherence, ensuring that the final manuscript effectively communicated the intended strategic insights.
- **Graph Generation:** To create or assist in the design of one or more data visualizations, charts, or diagrams on author-provided data and descriptions. All such graphs were reviewed, fact-checked, and edited by the authors for accuracy and relevance.

All AI-generated suggestions were critically reviewed, fact-checked against original sources, and substantively revised by the human authors. The final content, including all analysis, conclusions, strategic recommendations, and original case study narratives, remains the sole intellectual product and responsibility of the authors. No AI tool was used to generate core research data, case study findings, or the final critical arguments presented herein.

Disclaimer for Case Studies

The cases are developed for class discussion and educational purposes only. It is not intended to illustrate either effective or ineffective handling of an administrative, strategic, or branding situation. The events, data, and company information presented are based on real occurrences and publicly available sources, but certain details may have been altered or simplified to maintain confidentiality and to better serve pedagogical objectives. The views and opinions expressed are those of the author and do not necessarily reflect the official policy or position of the company or any other organization mentioned.

The cases are not intended as endorsement, source of primary data, or commercial analysis. Students, instructors, and other readers are encouraged to conduct their own independent research for any business or academic application.

Foreword

There is a moment every exporter knows well. It is the moment your product—something grown in your own soil, bottled with your own labor—crosses a border and becomes something else entirely. On a supermarket shelf in Europe or a dinner table in America, that bottle of olive oil is no longer just agricultural produce. It is a promise. It is a story. It is, for all practical purposes, a diplomat without a passport.

I have spent my career building brands in a global marketplace that does not owe Tunisia any favors. When we created Terra d'Elyssa, we were not simply competing on price or quality—though both must be beyond question. We were asking international agents, distributors, value added reseller, retailers and consumers to trust a Tunisian name, to place it alongside the historic producers of Italy and Spain, and to recognize that excellence has no single address.

This is the reality of B2B Branding management in emerging economies. We do not inherit trust; we earn it, bottle by bottle, contract by contract. And we defend it against forces that would see it diminished.

The Tunisian olive oil sector is the lifeblood of thousands of families and the source of billions in foreign currency for our nation. But an industry is only as strong as its weakest link, and a national brand is only as respected as the integrity of its largest players. When our sector faces disruption - whether from market volatility, international competition, or instability at home - the brand suffers. I have witnessed firsthand how quickly hard-won reputation can be placed at risk, and how essential it is for business leaders to act as stewards not only of their companies, but of their country's commercial image.

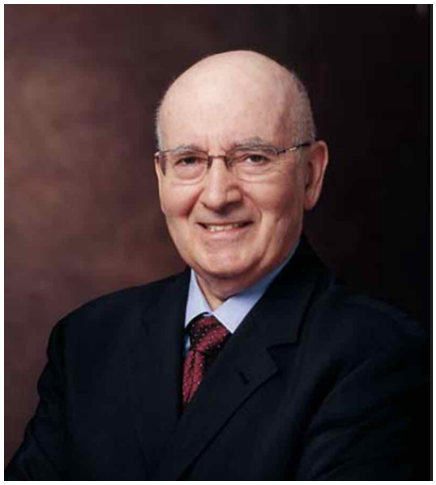

This publication you hold addresses the core challenge of our time: how to build and protect B2B Brandings in a complex, interconnected, and sometimes unpredictable world. The principles within these pages are not abstract theories. They are the very tools that determine whether a Tunisian product reaches a Tokyo

port, whether an American distributor renews a contract, and whether a European retailer places our oil at eye level rather than on the bottom shelf.
I commend the authors for tackling these subjects with the seriousness they deserve. In an era where information travels instantly and perception can shift overnight; brand management is not a luxury—it is survival. For Tunisian businesses seeking to expand beyond our borders, for African enterprises claiming their place in global supply chains, and for any B2B leader who understands that reputation is the most valuable asset not listed on a balance sheet, the insights gathered here will prove indispensable.

May this work inspire you to build brands that endure, that travel well, and that carry the dignity of their origins with them wherever they go.

Founder and CEO, CHO Group

About the Authors

Dr. Philip Kotler

is widely recognized as one of the **most influential figures** in the field of marketing. He was the **S.C. Johnson & Son Distinguished Professor of International Marketing** at the **Kellogg School of Management, Northwestern University, Evanston, Illinois**. He received his master's degree at the **University of Chicago** and his PhD Degree at **Massachusetts Institute of Technology**, both in economics. He did post-doctoral work in mathematics at Harvard University and in behavioral science at the University of Chicago.

Professor Kotler is the author of more than 100 books many article such as: **Marketing Management**: Analysis, Planning, Implementation and Control, the most widely used marketing book in graduate business schools worldwide; Principles of Marketing; Marketing Models; Strategic Marketing for Non-profit Organizations; The New Competition; High Visibility; Social Marketing; Marketing Places; Marketing for Congregations; Marketing for Hospitality and Tourism; The Marketing of Nations; Kotler on Marketing, Building Global Bio Brands, Attracting Investors, Ten Deadly Marketing Sins, Marketing Moves, Corporate Social Responsibility, Lateral Marketing, and Marketing Insights from A to Z. He has published over one hundred articles in leading journals, several of which have received best-article awards.

Professor Kotler was the first recipient of the American Marketing Association's (AMA) "**Distinguished Marketing Educator Award**" (1985). The European Association of Marketing Consultants and Sales Trainers awarded Kotler their prize for "Marketing Excellence". He was chosen as the "**Leader in Marketing Thought**" by the Academic Members of the AMA in a 1975 survey. He also received the 1978 "Paul Converse Award" of the AMA, honoring his original contribution to marketing. In 1989, he received the Annual Charles Coolidge Parlin Marketing Research Award. In 1995, the Sales and Marketing Executives International (SMEI) named him "Marketer of the Year".

Professor Kotler has consulted for such companies as IBM, General Electric, AT&T, Honeywell, Bank of America, Merck and others in the areas of marketing strategy and planning, marketing organization and international marketing.

He has been Chairman of the College of Marketing of the Institute of Management

Sciences, a Director of the American Marketing Association, a Trustee of the Marketing Science Institute, a Director of the MAC Group, a member of the Yankelovich Advisory Board, and a member of the Copernicus Advisory Board. He has been a Trustee of the Board of Governors of the School of the Art Institute of Chicago and a Member of the Advisory Board of the Drucker Foundation. He has received honorary doctoral degrees from the Stockholm University, University of Zurich, Athens University of Economics and Business, DePaul University, the Cracow School of Business and Economics, Groupe H.E.C. in Paris, the University of Economics and Business Administration in Vienna, Budapest University of Economic Science and Public Administration, and the Catholic University of Santo Domingo.

Philip Kotler is one founding member of **The Sarasota Institute**, a think tank located in Sarasota, Florida. He has travelled extensively throughout Europe, Asia and South America, advising and lecturing to many companies about how to apply sound economic and marketing science principles to increase their competitiveness. He has also advised governments on how to develop stronger public agencies to further the development of the nation's economic well-being.

Dr. Waldemar Pfoertsch

Waldemar Pfoertsch has redefined how organizations approach **B2B Branding Management** and **Human-to-Human (H2H) marketing** in a digital, sustainability-focused world. With an academic legacy spanning Europe, the United States, and Asia, his expertise bridges global strategy with authentic customer connection.

A pioneer in human-centric marketing, Dr. Pfoertsch is Professor of Marketing Management and Strategic & Digital Marketing at the **CIIM Business School of the University of Limassol, Cyprus**, and Professor Emeritus of International Business at Pforzheim University, Germany. His research focuses on H2H Marketing, B2B Marketing, and B2B Branding Management. He has lectured at Mannheim Business School, Tongji University (Shanghai), Technical University of Munich (TUM), ITM Sweden, the Indian Institute of Management Calcutta (IIMC), and the Graduate Business School of ESAN in Lima, Peru.

From 2007 to 2010, he was Professor of Marketing at the **China Europe International Business School (CEIBS)** in Shanghai. His other teaching roles include the Executive MBA Program at the University of Illinois at Chicago, Visiting Associate Professor at the **Kellogg Graduate School of Management** (Northwestern University), and Lecturer for Strategic Management at **Lake Forest Graduate School of Management**. Since 2001, he has taught online with the University of Maryland University College. He began his academic career as a Research Assistant at the Technical University of Berlin (TUB).

Dr. Pfoertsch is a prolific author and contributor to the marketing discipline. He has co-authored several seminal books, including B2B Branding Management (with Philip Kotler), H2H Marketing: The Genesis of Human-to-Human Marketing (with Kotler and Uwe Sponholz), and Transformational Sales: Making a Difference with Strategic Customers (with Philip Kotler and Marian Dingena). His work has been published in leading journals such as the Journal of Business & Industrial Marketing, Industrial Marketing Management, and the Academy of Strategic Management

Journal. He is a frequent keynote speaker at international conferences on branding, digital transformation, and the future of B2B marketing.

Dr. Pfoertsch brings extensive management consulting experience in the USA, Europe, and China. At **UBM/Mercer Consulting Group**, **Arthur Andersen Operational Consulting**, and **LEK Consulting**, he helped companies develop international strategies. Earlier, he held sales and strategy positions at Siemens AG in Germany and the USA and served as an Economic Advisor to the **United Nations Industrial Development Organization (UNIDO)** in Sierra Leone, West Africa.

His consulting clients have included multinational corporations across the automotive, technology, and industrial goods sectors.

His research interests have long centered on the globalization of high-tech companies and their marketing and branding efforts. His current research focuses on **Human-to-Human marketing** in industrial companies, particularly the role of artificial intelligence in enabling empathetic customer relationships at scale. He is also actively investigating the integration of sustainability metrics into brand valuation frameworks.

Dr. Pfoertsch has received multiple teaching excellence awards and has been recognized as a thought leader in B2B branding by industry publications. He serves on the editorial boards of several marketing journals and advises startups and established firms on brand strategy and digital transformation.

Walid Kallel

Strategic Marketing Consultant & Brand Educator

Walid Kallel is a visionary in the world of brand strategy and marketing transformation, whose work has quietly reshaped the landscape of Tunisian industry. A graduate of the Faculty of **Economic and Management Sciences of Tunis**, where he earned his master's in economics, and holder of the Advanced Specialized Certificate in Marketing Techniques from ESC Tunis, Walid brings a rare blend of analytical rigor and creative vision to the brands he guides.

Over the past two decades, he has advised **more than 200 Tunisian enterprises**, helping them move beyond transactional marketing to build enduring brand identities rooted in strategic clarity. His mission? To transform companies from mere suppliers into recognized leaders—organizations that stand for something distinct, credible, and human.

As a **brand architect**, Walid doesn't just design logos or slogans. He builds foundations. He has spearheaded the development of comprehensive brand leadership platforms for pioneering industrial firms such as **SIFCOL** (industrial chemicals), **MPBS** (engineered wood panels), **AMECAP** (medical services), and **WINOX** (design-driven tableware). In these demanding B2B environments - where technical expertise often overshadows storytelling - he has proven that **credibility is not claimed, but earned** through consistent alignment between promise, behavior, and perception.

His approach is holistic: weaving together **visual identity, narrative coherence, customer experience, and internal culture** into a unified brand ecosystem. He understands that in B2B, trust is built slowly, across countless interactions—between engineers, procurement managers, service teams, and decision-makers. That's why his strategies don't live in PowerPoint decks; they live in the way people show up.

Walid's advisory portfolio reflects both breadth and depth. It spans **international development institutions** such as **GIZ**, the **European Bank for Reconstruction and Development (EBRD)**, and **FOPRODEX**, where he has supported SMEs in scaling with purpose. At the same time, he has partnered with **ESSILOR ACADEMY**, the

academy of the world leader in optical lenses, to train and coach its optical clients in **Tunisia, Senegal, Ivory Coast, Cameroon**, and other countries, with the aim of educating them on how to best support their customers who wear glasses and improve the value proposition and the overall customer experience.

At the core of his philosophy lies a powerful conviction: **a company's primary capital is not its machinery, balance sheet, or even its products - it is its brand.** This intangible asset - the promise that lives in the customer's mind - is the true engine of value creation. And in today's crowded, fast-moving markets, only those brands with a clear, differentiated identity can command loyalty, attract talent, and sustain growth.

But Walid goes further. In a sector often obsessed with metrics and messaging, he insists on the **human dimension of branding** - especially in B2B, where relationships are everything, yet rarely named. He believes that **branding is, at its heart, a human endeavor**. It's about listening. About empathy. About elevating teams, educating partners, and walking alongside leaders through transformation.

That's why he calls himself not just a consultant, but a **brand educator**. Because sustainable change doesn't come from top-down mandates - it comes from shared understanding. From people who believe in the brand because they helped shape it.

Today, Walid continues to mentor, advise, and inspire - a quiet force behind some of Tunisia's most respected B2B brandings. And his message remains clear:

To stand out, you must first know who you are. And to grow, you must never forget the people who make it possible
